

ENGR COURSE STUDENT LEARNING OUTCOMES

ENGR 100 - Introduction to Engineering Design

CSLOs are under review.

ENGR 110 - Introduction to Renewable Energy

CSLOs are under review.

ENGR 241 - Statics

Students will be able to apply principles of engineering, science, and mathematics to formulate and solve complex engineering problems.
(ABET SLO #1)

Students will be able to solve equilibrium problems using the appropriate equilibrium equations as applied to statics.

Students will be able to collect and analyze experimental data using engineering principles.
